MachineMate, Inc. President & CEO Retires

December 17, 2007 - Fond du Lac, WI USA, MachineMate, Inc. announces that Nyles Priest, President & CEO will retire from MachineMate, Inc. at the end of 2007. Nyles Priest was instrumental in establishing MachineMate, Inc. as a company when Giddings & Lewis sold the trademark rights to the company on September 1, 2000 and has been with the company since the beginning. Mr. Hans Platt, Vice President of Sales at MachineMate, Inc. will fill this position starting January 1, 2008.

Mr. Platt has been the Vice President of Sales at MachineMate, Inc. since July 1, 2007. Mr. Platt has more than 20 years of CNC machine tool experience before coming to MachineMate, Inc. Mr. Platt is well suited to take over the control of MachineMate, Inc.

MachineMate has become a CNC of choice in the cutting machine market since their PC-Based CNCs provide the increased proven functionality required for the cutting machine market. Waterjet, Plasma, Laser, Welding, Routers are some of the cutting machines that use MachineMate CNCs. Besides cutting machines MachineMate continues to provide superior CNCs for the standard machine tool lathe and machining center markets.

MachineMate's parent company, Power Automation of Germany has also seen significant success worldwide in the OEM cutting machine market. They have several Laser, Waterjet, Plasma OEM manufacturers on board in Europe and Asia.

The Power Automation/MachineMate common hardware/software platform affords ultimate flexibility to support up to 64 axes of motion, interface to analog, digital and SERCOS drives, expandable programmable I/O, and user configurable Human Machine Interface (HMI). Products include a family of state of the art open architecture PC-Based CNC controls. This family of CNCs consists of the eCNC, L2, and LW CNCs. MachineMate CNCs are expandable to 64 axes and up to 8 simultaneous part program paths for each up to 8 axes simultaneous.

To learn more about this leading edge CNC Product contact MachineMate, Inc. at 920-907-0001 or have a look on our web site at www.machinemate.com.
